5. **The “Strawman” concept** – We explain how we were corporatised by the government in order to “do business” with us, and this same principle flows on to banks and other lending institutions. This is a vital concept to understand, and we cover it from the perspective of using it to deal with banks. - Page 43

Foreword

We would like to begin by congratulating you on making the decision to stand up for your financial rights, and for taking action to learn what the banks and the current monetary system are **really** all about. As our tagline says, this book is all about learning “the truth about the banks and how to beat them”. Obviously, learning the truth is only the first step, however, and it important to put that knowledge into **action**, and that is the second key aspect of this e-book.

Unfortunately, with the current corrupt system, the banks are fully protected by the courts so, in a lot of instances, there is still not a lot that you can do to directly challenge the banks with regards to mortgages, for example, just yet. Having said that, though, there are many situations where you **can** still effectively challenge the banks and, in those instances that you can't yet, by getting this information out to the general public, we will hopefully be in a position to directly challenge the banks in those areas, in the not-too-distant future.

Exposing the banks' secrets and making the general population aware of the fraud that they commit every single day, is one of the keys to ultimately bringing an end to the current corrupt banking system.

We appreciate that many of you are extremely frustrated with the current banking and monetary system and are eager to find out exactly what you can do to bring about some changes. We know your time is valuable, and that is why we have kept all the chapters short and directly to the point. We do not want to hold you up any longer, as we know you want to get straight into it.

However, due to the nature of the information contained in this e-book and how keen the banks are going to be to shut us down, we must firstly direct you to read the Legal Notice section. Once you have read that and agreed to the terms and conditions within it, we encourage you to make your way through our e-book, and enjoy the journey of learning the truth about what the banks are desperately trying to keep hidden from the general public.
